

What is the CPRS?

The Computerized Patient Record System (CPRS) is a Veterans Health Information Systems and Technology Architecture (VISTA) product that presents a comprehensive view of a patient's clinical information in an action-oriented environment. The application organizes and presents all relevant data on a patient in a way that directly supports clinical decision making. CPRS integrates Adverse Reaction Tracking, Bed Control, Consults, Dietetics, Encounter Forms, Order Check Expert System, Inpatient Pharmacy, Laboratory, Order Entry, Outpatient Pharmacy, Problem List, Radiology/Nuclear Medicine, Registration, Scheduling, Text Integration Utilities, and Vitals. It organizes and presents all relevant data on a patient in a way that directly supports clinical decision-making. This data includes medical history and conditions, problems and diagnoses, diagnostic and therapeutic procedures, and interventions.

Features:

- Time-delay capability for pre-admission, discharge, and transfer orders
- Complete Order Sets that can be pre-defined and personalized
- Order checking
- Orders integrated with progress notes, results, procedures, diagnosis, and Problem List
- Patient/Provider linkage
- Consistent, event-driven, windows-style clinical user interface
- Integrated view of patient information.
- Improved accessibility of online clinical information and results, locally and remotely
- Decision support through order checking, alerts, and clinical reminders
